

departments, 136 affiliated colleges with about one 1,03,000 students. There are about 7,000 students in the campus offering undergraduate, post graduate and doctral programmes

The department of physics was established in year 1964 as a PG department. The broad areas of research are in

condensed matter physics (which includes the nanotechnology and nanoscience group, Compton studies group, dielectric and transport properties group and also theoretical condensed matter physics), ionospheric & atmospheric physics, astronomy & astrophysics. The department is also engaged in interdisciplinary research in collaboration with chemistry, geology and life science departments. The department has several sophisticated equipment and has been under UGC Special Assistance –DRS from 1987 onwards. It is currently under UGC Special Assistance, DSA level. The department also has research collaborations and association with other universities and Institutions.

REGISTRATION FORM

WORKSHOP ON NANOSTRUCTURED MATERIALS (WNM-09)

24th October, 2009

Department of Physics
Mohanlal Sukhadia University, Udaipur

Name

Organization

Address

.....
