Vision for the Academic Development

of

MOHANLAL SUKHADIA UNIVERSITY UDAIPUR

I have following vision for Mohanlal Sukhadia University :

1. **Teaching and Examinations:** The basic work of the University is teaching and research for the award of the degree and to create new knowledge through high quality in the various areas of its endeavor. Good academic practices need to be strengthened for which, the classes should be run properly and timely and the examinations of the teaching programmes should be held in time. Furthermore, continuous evaluation should be carried out properly and timely. For all of these activities, well laid down annual plans need to be chalked out and appropriate academic calendars should be made which need to be followed religiously.

2. **Alumni Connect:** The University has to develop positive and fruitful connect with its alumni in various areas. They have to be contacted for mentorship of present students in respect of Internship, Skill Development and Startups. They should be invited to motivate the students through lectures, seminars or video conferencing and should be involved in student-faculty exchange programs. Alumni convergence functions should be organize every year on the foundation day of the University.

3. **Centers of Excellence:** The different faculties of the university such as Science, Management and Humanities can have collaboration with various labs and establish centers of Excellence in the University. These Centers will have to collaborate at international level. This will increase the research output and patents at the University level.

4. **Innovation and Incubation Centre:** There should be Innovation and Incubation Centers in the University to provide opportunity to the students to harness their innovative skill and come up with innovative Projects/Products/Ideas which can be incubated into a finished, commercially viable product form. For this to happen, an appropriate place should be provided with computers and internet facility and small workshop equipped with most modern gadgets for building hardware prototypes for converting their ideas into reality.

5. **Startup Cell:** There should be a startup cell in the University to provide place and opportunity to the students to develop their Startups. With such a facility created in the University campus, the faculty may also be involved with the students and companies may be created as joint ventures with the University.

6. **Research and Development:** While fundamental research, leading to the creation and advancement of new knowledge, is extremely important to the University, the faculty members of the university should also be encouraged to provide consultancy to industries, Government Departments and private sectors, in their own areas of expertise to industries, to increase the revenue of the University using their experience and research.

7. **Training and Placement Cell:** The Placement Cell should be strengthened for creating opportunities to hold a number of campus placements. The training department will train the students in respects of personality development, ethics and moral values on one side and skill development in the modern areas relevant to the industry on the other side.

8. **CSR & Community Development**

9. **Interaction of Schools Children with University**

10. **Focus on Technical, Professional & Paramedical courses**

With the above activities taken care of, I believe that the student and teaching fraternities would be inspired to carry the name of MOHANLAL SHUKHADIA UNIVERSITY, UDAIPUR to new heights to enable it to become one of the top ranking Universities of the nation with a very high global ranking.
