## About the Conference

National Conference on 'Recent trends in Polymer and Chemical Sciences' will be held in Mohanlal Sukhadia University, Udaipur from 5<sup>th</sup> to 6<sup>th</sup> January 2024. The conference would be dedicated to the chemical and polymer science with an extensive interaction among academicians, researchers, technologists and policy planners. The conference would provide an excellent platform to the scientists and researchers for interaction in different domains of chemical and polymer science. We have special sessions for our young scientists to contest for the oral, poster and wisdom contests. Over the last few decades, the research in polymer as well as chemical sciences has observed tremendous growth and has become very dynamic mainly of incorporation of new techniques, novel materials, sophisticated analytical instrumentation facilities and new methods. We invite a wide variety of stakeholders from research and academia, to industrial sectors as well as government organisations. There is strong need to have interdisciplinary approach towards the chemical sciences and biological as well as materials sciences so that people from different background can join hands together and carry out multidisciplinary research in a collaborative manner. The conference offers such a platform for all the stakeholders.
