Prof. J. P. Sharma
Vice Chancellor

Today, career planning needs a scientific approach to get success. MLSU Udaipur, under the visionary leadership of Vice Chancellor Professor J. P. Sharma aims to establish its credibility through quality education backed by academic rigour with industry focused curricula and practical hands-on training on professional etiquette through the Finishing School Program. Impetus has been given for the development of Finishing School because the greatest challenge for employment in 21st century would be to improve knowledge and worker's productivity.

Industrial economy driven by raw material and physical output has given way to knowledge-based economy driven by ideas, services and innovation. This has led to fundamental changes in the labour market, which in turn, demand a change in education and training.

A study attributed to Harvard University found that when a person gets a job or a promotion, 85% of the time it is because of his **attitude**, and only 15% of the time because of his intelligence and knowledge.

Dr. Neeraj Rawat
Consultant & co-ordinator

Dr. Neeraj Rawat is the Consultant & Coordinator of the Finishing School Program. He has more than 22 years of work experience (corporate and academic) and has studied in premier institutes of India and abroad. He has done MBA from Griffith University, Australia and was awarded fellowship by Korea Research Foundation (Jawaharlal Nehru University, New Delhi). He has a good mix of industry and corporate experience in a highly competitive environment at international level.

The biggest challenge Indian education system face today, is employability. Dr. Neeraj Rawat opines that one of the major reasons why graduates, even from reputed institutes, are not easily employed is because they lack behavioural skills and hands-on skills for work.

'The Finishing School Program' offers a unique opportunity for the students to make themselves equipped with new and emerging challenges in the industry. The program offers technology training, aptitude training, soft skills training and live internship programs. It will make students ready for effective role in professional world as well as a sophisticated multicultural society.

*William James of Harvard University said, "The greatest discovery of my generation is that human beings can alter their lives by altering their **attitudes** of mind"*

Why you should join Finishing School Program:
